Summary for Week 1

As a group for week 1, we started to bounce ideas to each other on what we should be doing for this project. We had many great ideas coming from each other and it took time to decide which one we actually wanted to do which lead us to this. We then started to plan out what we wanted to do with this idea. We listed ideas of which one would better fit into this PHP project. Later that week, we decide to make a drawn out basic layout of what we want. Each team member drew what they thought how the website will look at. Finally, we looked at each other's drawing and picked which individual part we liked from each other.
